Riney's Circle R Construction Objective:

We have been in business for 17 years. We pride ourselves on building quality, affordable custom buildings, because we manufacture and erect our custom line of buildings, no middle men are involved which enable for the cost savings to be passed onto the customer.

We also do weld-up construction and offer a line for pre-manufactured bolt-up type buildings, which are commonly used on our commercial buildings and covered arenas.

We also offer turn-key projects, which allow the owner to deal with only one contractor, making the building experience more pleasurable for the owner.

Coming from a background which includes horses, rodeo and competing at all levels, we understand the needs for the horse barn customer. Since we are a custom builder we build what you want rather than tell you what you are going to get.

Background:

We started Circle R Construction in 1991 and got our LLC. in 2005 and then became Riney's Circle R Construction, LLC. We are into all types of Construction, from Commercial, to residential, Equine Facilities and General Contracting. Following are a few projects of Riney's Circle R Construction, LLC.
